- ◆ 13:00-13:30 Sign-up for interview (if interested)
- ◆ 13:30-14:30 Interview

#### WHO WE ARE

West Taiwan Digital Technology Center is dedicated to exploring and utilizing leading-edge software development technologies to build high-quality software. Current and future development projects involve industrial production and automation, medical monitoring and analysis, smart medical devices, healthcare data exchange system and IoT for hospitals. With an international team of software engineers in Taipei and Taichung, we have developed a broad scope of technological expertise including machine-learning, mapping systems, cloud infrastructure, highly scalable clusters, infrastructure-as-code and testing automation.

#### WHAT WE DO

- ◆ Developing next generation processes to drive advanced manufacturing technology within our global operations
- ◆ Connecting medical devices in real time across our 25 manufacturing sites globally
- ◆ Working on innovative advancements in distributed systems, IoT connectivity and high-quality software development
- ◆ Bringing Industrial IoT to a global scale as well as bringing to market compliant Software-as-Medical-Devices (SaMD) solutions
